

DSX Access Systems, Inc.

WinDSX Integration

DSX has an intelligent and long term approach to Integration. We provide solutions that have a layer of separation and sophistication that allows the continuation of DSX development without breaking or disturbing the existing integration to the other systems.

- **Schlage® AD300 / AD400 Locksets**

The Hardwired and Wireless Locksets provided by Schlage can now be integrated into the WinDSX system. DSX-L85 will communicate the RSI protocol to the AD-300 and the PIM400-485. This allows both hardwired and wireless locksets to be used at the same time. The AD-300 Locksets communicate RS-485. Up to 16 AD-400 Wireless Locksets can communicate to a PIM400-485 that also communicates RS-485. L85 will communicate and supervise both locksets.

- **Integrated Biometrics**

The TRU650 for Physical Access Control is a fingerprint biometric system with an integrated proximity card reader. The TRU650 is seamlessly interfaced with WinDSX for an Enterprise Solution. With enrollment integration you only enter the card holder's information one time. Add a card holder to the DSX system as usual and click a button within the program to enroll the fingerprints.

- **DVR/NVR Integration**

DVR and NVR systems can be accessed over the Network by WinDSX allowing live or recorded video to be requested and played. Cameras can be defined in WinDSX for viewing on demand. Recorded video can be played back when reviewing a history report in DataBase. Cameras can automatically be displayed upon predefined alarms. Below is a list of most of the DVR/NVR systems that work with WinDSX.

Avigilon, Bosch DiBos/DiVar, cVideo, Dedicated Micros, Exacq Technologies, Inc., General Solutions, I3DVR International, I Watch LPM / XP, JDS, Kalatel, March Networks, ONSSI, OpenEye, Panasonic, Pelco/Digital Sentry, Prowler Sentry, RTS Sentry, Salient Systems, Say Security Group USA LLC, Sigmax, Strand, ViconNet, Toshiba / Surveillix, and IP Cameras.

- **EasyLobby®**

EasyLobby®, the industry leader in secure visitor management solutions and DSX have an integration module that seamlessly integrates WinDSX Access Control and EasyLobby's SVM (Secure Visitor Management) software.

- **Que Accounting Inc.**

A long time partner of DSX, Que has developed several advanced applications that integrate with the DSX system. Advanced Applications include: Time and Attendance, Job Costing, Visitor Management, Gatehouse Management, Parking Garage Monitor and Count, Trackit Suite, Day Care Security, Session Attendance, and Inventory.

- **Jolly Technologies**

Jolly Technologies, maker of Lobby Track, provides an integrated visitor management system that streamlines the registration and credentialing process for a visitor.
